The Great Lakes Swim Race will be held Saturday at the Port of Welland, and the race will feature swimmers who don't have to worry about diving into frigid, choppy waters. The race is open to both men and women aged 18 and older. The race covers the 49-kilometre distance of the Welland Canal from Welland to Port Colborne, Ont. The entry fee is \$175. "This is a true aquatic event, so we're seeing a lot of fast times on water," race director Peter Metcalfe said. "We're seeing more and more of these types of events being popular with people of all ages." The first team to cross the finish line will win. The race will take place on Saturday, June 4 at the Port of Welland. (Google Maps) The race includes a swim, a bike and a run. All three events will be held on the same day. The swim is a 1,500-metre race that starts at 11 a.m. and continues until 2 p.m. a1d647c40b

It is one of the largest coach manufacturers in Italy, with 2,100 employees and around 3,200 vehicles sold annually. Its principal models are the VIAO Mobili (transit buses), and the Quattroruote (passenger coaches). History The company was founded in 1989 by a group of engineers, from the family of the coachbuilder Rolandi, who decided to sell the licence for the manufacture of buses of the coachbuilder in a more competitive market. The first contract was for the supply of vehicles to the Etruria Metropolitana (Metro), and the company began to expand quickly. The company now has a production capacity of 1,500 vehicles annually, and the Quattroruote and VIAO Mobili models are the best-selling models in Italy. The company was bought by a US group in 2004, which in turn sold the company to a consortium of local investors in 2008. Product range The company is a manufacturer of buses of various types, and is one of the largest in the country. It currently offers 1.9 million metres of coach- and bus-production worldwide, and 60,000 units in Italy. It is also the largest importer of buses in Italy. The company produces the only model of coach in the world with the independent suspension system, which consists of two series of wheels with independent suspension, and another series with a single suspension. The aim is to achieve the weight reduction needed for high speed transportation. Quattroruote The VIAO Quattroruote is a series of coaches designed by Fissore. It is made in two versions, one with

What's New in the?

You've previously seen the new Markup Import option that automatically embeds the feedback from PDFs, CD-ROMs, etc. in your drawing. Markup Assist goes one step further. With the new Markup Assist option, the drawing will automatically import any feedback from a paper document, and combine that with information from a PDF that is attached to the drawing. The Markup Assist option uses the same technology that enables you to combine PDFs with other drawings to help you create an index. Just drag and drop your paper documents from the documents tab of the Markup Assist dialog into the Markup Assist window. Make changes to your drawings and save them to a new drawing for review. As you work, you'll see feedback from the paper document appear as tool tips on your drawing. Later, you can print and review it on paper. In this short video tutorial, we demonstrate the markup imports and Markup Assist options in AutoCAD. Live Technology: Shape Matrices: Create custom grips for selections and annotation. AutoCAD 2023 introduces a new dynamic snapping option that makes it easier to select objects and retain selection when moving. This feature can be accessed by clicking the Icon on the status bar or by pressing F3. There are three new navigation options in the Shape Matrix dialog box. Navigation 1: The first one is one of the easiest to use. It allows you to select and keep the currently selected objects in view. It also lets you define and select points on the navigation lines. Navigation 2: Navigation 3: The second type of navigation is similar to the first except it includes a right-click menu of navigation options. This can be very useful when navigating around the screen using your mouse. For example, you could use Navigation 2 to select an object and then right-click to select Navigation 3, which will display all the navigation options for the selected object. This would let you navigate with great precision. Customize Toolbars and Menus: Modes: The Modes option lets you choose how you want AutoCAD to behave when you select various drawing objects. You can choose from more than 30 different behavior modes. These settings can affect the way AutoCAD imports, converts, and interacts with external files. Selecting Objects: Each behavior mode also includes specific options for performing various tasks
