Computer Quiz

Computer Quiz is an application that allows you to create quizzes, program them, display them and even answer them. It is extremely simple to use, no matter what level of proficiency you may have. Quizzes can be created and displayed in two ways: Standard Quiz. Quizzes created with this method of operation have four buttons: – Question to test. – Answer to test. – Answer for correct. – Answer for incorrect. The design is intuitive, allowing you to create quizzes in a very short time. Multiple choice quizzes. Quizzes created using this method have three buttons: – Question to test. – Answer. – Correct answer. The files have a common format and can be exported to an easy-to-use spreadsheet, or PDF, or saved as a default for future testing. The application sports some additional features that you can use to your advantage. It can be used for creating multiple-choice computer quizzes in two modes: • Standard mode. Quizzes created in this manner have four buttons: – Question to test. – Answer to test. – Answer for correct. – Answer for incorrect. What's the main difference between the two modes of operation? The first one is the standard mode, in which the user will be presented with the following buttons: – Question to test. – Answer to test. – Answer for correct. – Answer for incorrect. The second mode is called multiple-choice quiz, in which the user will be presented with three buttons: – Question to test. – Answer. – Correct answer. It can be used in testing purposes. Who can benefit from this software? Computer Quiz allows you to create and test quizzes. It allows you to create custom tests or questions, which you can use in any computer class in order to help students. It allows you to create questions for students, teachers or employers. It also allows you to answer quizzes in the customized mode. What's New In Computer Quiz?

Computer Quiz is a package of six apps that help you create, analyze and score text-based quiz tests. It includes games, quizzes, and polls. Once installed, the package automatically sets up a default directory and subdirectory for storing quiz files. Quiz types For any quiz, you can choose to display a fixed number of questions, or, like a real exam, it may have unlimited questions. There are two quizzes: Multiple Choice and Range - Multiple Choice. Multiple-choice quizzes have questions with four possible answers, while range quizzes have two questions with two possible answers, and a third question that you can choose to have a fixed range. Both quizzes have three different quiz styles, the best quiz, short quiz, and long quiz, which have a fixed number of questions, a random number of questions, and an unlimited number of questions, respectively. Quiz analysis After you have taken a quiz, you can view its results, based on the stats mode, as well as a table of the questions you took, and the total score. You can show or hide questions, answers and answers choices. You can even set your quiz file so you can view it by yourself or in a trial version. Compatibility The games can be played on iOS and Android devices. Scoring When you create a quiz, you can attach a scoring formula to it. With this, you can play a customized game. For example, you can use a penalty of one point for incorrect answers, a bonus of one point for correct answers, or use both. You can set up the level of scoring, and you can display it in the report view or as a pop-up window. Version 4.0.8.0 was released on Sep 1, 2013.Our goal is to be your "go-to" source for providing quality decks for your small business needs.
