Similar presentations 1 Combining 2 SETs in the Korg Pa Sequencer 2 Combining SETS in the Korg Pa Sequencer 3 Every time you Start a Korg Pa sequencer you are Creating a NEW SET that is its own isolated world. Right away you can see the worlds differ as you look at each of them. This may be a world of just Bass or it could be full of everything else. 4 The 2 following pics illustrate how even though these are both these same 2 sets, they are so different in the appearance of the sequencer that they could not be mixed together! 5 Creating SETS in the Korg Pa Sequencer 6 Creating Combinations of 2 SETS (Each with its own mixer) 7 In order to have a Mixed SET with controls from 2 different or even 3 different mixing screens we must use the Fuse mode of the sequencer. The Korg Pa sequence / Fuse mode is an 8 bit monophonic sequencer, that creates a unique world for you to create sounds in. You could then combine these different worlds to create a new and unique world that you can't create using any of the SETs or MIDI settings. 8 The only way to combine 2 SETS to create a new one is to use the Fuse mode of the Korg Pa sequencer. To use the Fuse mode of the sequencer you must first start the sequencer with the FUSE (Fused) mode, then start a sequencer as usual, but with the source appearing at the top. It could look something like this: 9 Once the 2 SETS have been Started in the FUSE mode, you could still combine them with the normal settings of the sequencer. 10 Say for example we have a 2 SET for Gtr/Bass and a 2 SET for Pianos/Strings. 11 If they were placed in the FUSE mode we could then create a new world by combining them. 12 Then we could play in this new world and play the bass sounds on the gtr and the sound of the piano on the bass strings. 13 This being, a more advanced thing you must have a little experience and know what is happening. 14 If you can't figure it out that is ok, but be sure to ask someone who knows what they are doing.
