This article is just a selection of the many we have written over the years. For more information about the design process or if you would like to discuss a project with us [click here](#) to get in touch. Inexpensive small kitchen refacing If the kitchen at your home is too small for all the appliances you need, or the overall layout of the kitchen doesn't suit the way you cook, then the best way to increase its usability is through the medium of a small kitchen revamp. You can drastically increase the efficiency of your kitchen by cleverly designing your space to be more conducive to the way you cook. This means using appliances such as the stove, dishwasher, sink, and microwave in a space that is proportionate to their size. It is all about making the most of your space. If you keep any unused items in the cupboards, or fit one or two more appliances, it will more than repay you for the little investment. One such way to design your kitchen for efficiency is by laying out all your appliances in one area. This means that all your appliances can be within easy reach. This also keeps your kitchen looking tidy, as it will look nice and cosy. The end result is that the kitchen will look larger than it is. Alongside this, you can buy kitchen furnishings with items such as benches and stools, which will take up a lot of space but are quite useful for cooking. Another way you can easily increase the size of your kitchen is by adding a large island. This is an excellent way to create a warm and welcoming space, which is ideal for social gatherings. Kitchen expansion When you expand your kitchen, it can be an excellent way to increase the size of your kitchen. However, this is an expensive option, so you need to be sure that it will give you value for money. Before you expand your kitchen, you need to make sure that it is possible. If you are sure that the kitchen will grow and that you want to take on more space, then you should consider how this will affect your structure and your budget. You should also consider whether you have the space for a new kitchen.
