What's New In?

It is a well-known fact that the latest versions of Windows come with support for sticky notes or memos that you can place wherever you like on the desktop. But if the ones provided by default in your OS do not seem enough, you can always turn to third-party software solutions to improve your experience. Nitti's Do This Memo is a simple application that provides you with a straightforward solution for keeping memos and notes on your computer's desktop. Features a typical installation and outdated looks Subsequent to a typical installation process and upon first launching the application, you are met by an almost too compact main window. The first thing that strikes you when looking at Nitti's Do This Memo's interface is how outdated it looks. With an even smaller menu bar and a minimal set of buttons that would be at home on pre-2000 Windows editions, the interface is not something to be very fond of. Simple app with a straightforward workflow Nevertheless, thanks to a straightforward workflow, you can easily add new memos, access the memo index and the app's Default Settings window. Once you create a new note, with the help of the contextual menu, you can just as easily save, delete or close it. In addition, you can change the caption name, the font and its alignment, the background color, as well as cut, copy and paste selected text, and that's about it. Not an application we would recommend for users with modern versions of Windows While the application works and maybe some users with an inclination for minimalism would like it, justifying its usage is somewhat difficult. Not only does the app lack in the feature department, but it does not look like it was designed in the last ten years. All in all, every way you look at the situation, Nitti's Do This Memo is an application that works but does not really have a tangible or quantifiable usefulness with today's versions of Windows. And since the development has been stopped a while back, chances are that not much is going to be improved from here onwards. Nitti's Do This Memo Review Nitti's Do This Memo is a simple application that provides you with a straightforward solution for keeping memos and notes on your computer's desktop. Features a typical installation and outdated looks Subsequent to a typical installation process and upon first launching the application, you are met by an almost too compact main window. The first thing that strikes you when looking at Nitti's Do This Memo's interface is how outdated it looks. With an even smaller menu bar and a minimal set of buttons that would be at home

System Requirements:

OS: OS X 10.8.x CPU: 1 GHz RAM: 512 MB GPU: XBox 360 (1080P) Wii U (1080P) Wii U (HD) Vita (WUXGA, 3:2) PS3 (1080P) Xbox One (1080P) XBox One (HD) PS4 (HD) PlayStation 4 Pro (1080P) Android (480P) Note:
