The software allows multiple 2D and 3D views, supports many object types such as lines, arcs, circles, squares, rectangles, 3D polylines, 3D surfaces, and 3D solids. It also supports layers and coordinates, drawing and placement of symbols and text, annotating drawings with dimensions, and complex filters. 2D and 3D views, Layers, and coordinate systems are also found in other Autodesk software applications such as AutoCAD Map 3D, AutoCAD Civil 3D, AutoCAD Electrical, AutoCAD Mechanical, AutoCAD Plant 3D, AutoCAD 360, and AutoCAD Architecture and Design Suite. AutoCAD is a commercial, Windows-based software application for commercial use. Ranks third in the U.S. market, behind AutoCAD LT and AutoCAD Architecture & Design Suite. According to some sources, AutoCAD commands are available in 34 languages, including Arabic and Chinese. ## What's New In?

New drafting tools: Drawnelevation: Draws a line segment on the boundary of a surface of a polygon, multipolygon, polyline, or arc, based on the closest edge. (video: 3:36 min.) Drafting with Tolerance: Autodesk has added the ability to draw with a specified tolerance level. This allows for additional control over the accuracy of the drawing and can be used for accuracy checks during design reviews. (video: 2:20 min.) Auto-Complete Fields: Auto-Complete commands are commands that fill in the field for the current value without the need to place the cursor in the field. Auto-Complete commands include arrow keys, words, and numeric values. (video: 3:18 min.) Drafting with Grid: Use the drafting grid as a table of reference. The drawing grid will always be in its initial state, ready to place tools. (video: 2:00 min.) Mass Auto-Complete: The new Mass Auto-Complete feature allows the user to select multiple objects from a group and automatically complete them. (video: 2:16 min.) New Grids: The standard grids (Footprint and Plot) are now available with a single-point dimension. (video: 1:35 min.) New and improved versions of existing features: Smart-Height and Smart-Depth: Calculate the height and depth of a line or polyline based on the cross section that includes its center of mass. (video: 1:17 min.) Word import/export: Exports the words on a drawing, as well as the associated, parent drawings. Words can be exported into other applications or can be placed on other drawings. (video: 1:42 min.) Text stroke: Text can be stroked with a freehand line. The text is stroked on a path, instead of being placed on a boundary. (video: 1:54 min.) Measure Tool: The Measure tool is faster, more accurate, and more precise, so you can place objects more precisely. (video: 1:13 min.) Brush Stroke: Brush strokes can be used to quickly and easily make, place, and edit
