What's New in the CamDesk?

CamDesk is a simple yet reliable software tool that enables you to quickly and easily record videos and take snapshots. With CamDesk you can use your webcam without having to install any additional drivers. The application's user interface is clean and elegant, and thanks to its features it is the perfect tool for recording video tutorials, high-quality surveillance or simply keeping an eye on a computer or laptop. Its design is compatible with all the major desktop environments. It works under Microsoft Windows XP, Vista, 7, 8 and 10. Capture all the precious moments of your daily life with the help of CamDesk! There are several different ways to take snapshots or record videos: you can take them with the help of the main window or the pop-up bar (with easy to use hotkeys) or by clicking on the snapshot capturing icon placed on the desktop. The application is extremely easy to use and thanks to its intuitive interface, you can take snapshots or record videos in no time at all. CamDesk has a variety of advanced size and image quality options, thanks to which you can capture videos of any size and quality. There are several different ways to control CamDesk: through the application's help, you can set the main window's opacity, while the pop-up bar can be placed anywhere on the desktop. System Requirements: -Microsoft Windows XP, Vista, 7, 8, 10 -Nvidia 3D Graphics Accelerator -Webcam device with a real-time driver -Minimum of 1GB of RAM -The installation file is about 1.2GB, so it should be available in any location on your PC's hard disk. How to Install: 1. Close all applications running on your PC 2. Download the CamDesk application. 3. Run the downloaded file. 4. Follow the on-screen instructions. 5. Install and Run the application 6. Connect your webcam device to your computer using USB and follow the on-screen instructions. 7. If you need to change the resolution settings, open the Main Window Options dialogue box, and adjust the settings accordingly. CamDesk Media: Snapshots (You can take as many as you want and as often as you want. Each photo will be saved with its

name in the same folder.) Video recordings (How many you can record depends on the size of your webcam device. You can record videos for as many as you want. Each recording will be saved with its name in the same folder.) Software & Service Comments (CamDesk is not affiliated with any of the software companies listed) CamDesk is a nice program. When you first open it up, it asks you where to put it on your hard drive. There are 3 options and you can pick any of them. I would use the default which is "My Documents", but it says you can choose any folder you want.

System Requirements:

-Windows XP / Windows Vista / Windows 7 / Windows 8 -1GHz dual core CPU (Intel Core 2 Duo, Core 2 Quad, Core i3, Core i5, Core i7) or better -2GB of RAM (3GB is recommended) -128MB of video RAM (256MB recommended) -A video card that supports OpenGL (NVIDIA GeForce 9 series and higher is recommended) -Internet connection -1024 x 768 display (or higher resolution)
