RSS Channel Writer [32|64bit]

RSS Channel Writer is a straightforward and lightweight software utility designed specifically to assist you in creating RSS content providing you with a friendly and comprehensible working environment. Intuitive and easy-to-use GUI layout The application features a user-friendly interface that is easy to navigate. And the built-in wizard helps less experienced users that do not have extensive XML syntax knowledge, create RSS feeds for their websites. Write and edit your RSS channel RSS Channel Writer enables you to create a new RSS post by providing details about the title, publish date, link, category and description. Additional options allow you to enter the email address of the editor and webmaster, but you can also type only their names. You can change the language the channel is written in, select the preferred encoding method from a largely populated list. Plus, you can set hints for aggregators telling them which hours or days they can skip reading your channel. Additionally, you can add text, insert images and hyperlinks, as well as view the HTML or XML code and copy it to the clipboard. Last but not least, you can save the information to XML or HTML formats and perform search operations. Other options of RSS Channel Writer let you open a webpage in the default browser, enable Cloud, set a password, ping servers to let them know that your RSS channel has been updated and upload your RSS feed through FTP servers. Conclusion RSS Channel Writer is a handy piece of software especially designed to help you create standard podcasts, iTunes or Google RSS feeds for your websites. It does not put a strain on your computer resources, using low CPU and RAM, and it responds promptly and smoothly to commands.
