Reduce your waste and spread the love Your best friend is a computer, a smartphone, a tablet, and so on. The device you love to use, you have carried for a long time. So how to maintain the device smoothly? Keep your computer and phone clean is the first thing. Get the full function of a device by keeping it clean. Cleaning tools include brushes, a cleaning cloth and wipes. Next, clean the internal surfaces of the device to ensure the air is clean and no foreign objects can block the action of the device. Clean the touch screen. Hold a cleaning brush and the screen clean can help. After using the brush, press it back to ensure that there is no damage to the screen. Install the best apps and software to make the device better. If there are dust on the touch screen, it will affect the accuracy and sensitivity of the touch function. How to fix slow phone? To make your phone faster and more usable, download and install software like our Ultimate phone optimizer. It can quickly fix many problems, especially problem related to memory, storage, security, performance, internet and other issues. How to turn off the phone in standby mode? If you need to turn off your phone while working, this is the best choice for you. While you sleep, your phone can also make phone calls, surf the internet and check email, so you need to turn off the phone as soon as you leave the place. To do this, open the hidden shortcut menu on the home screen. Then, click on the icon that looks like three lines. You can see an icon named "Power Options". Click on it to turn off the device. How to clean the back of your phone? Your phone is made from metal and plastic, and the dust will accumulate on the surface of the back side. Once it has accumulated, it will be stuck between the two, and then make your back will be scratch. So how to clean it? There are various ways to clean your phone, like using a soft cloth, or a digital camera cleaning brush, or a toothbrush.
