### What's New In Twitch Studio?

XBMC and the Kodi media player are the easiest way to play your music, videos, and add-ons in Kodi for free. Plug your iPod, USB stick or portable hard drive into your computer and copy your content over to your XBMC. The best thing about XBMC is that it runs on a computer, so you don't need any

additional hardware. You can play music, videos and your add-ons from a variety of sources like UPnP/DLNA, Windows shares, FTP, Amazon Cloud Player or playlists, your hard disk and much more. In Kodi you can stream your content over the Internet or store the downloaded files on a USB stick or SD card. Add-ons are made by users to extend the functionality of XBMC and create their own channels and playlists. With over a million add-ons available to download and great support for Spotify, you can also add a few songs to your XBMC and enjoy your music in a new and exciting way! IMPORTANT - Please install the XBMC-Plugin-Spotify instead of the official Spotify addon. If you are not running the XBMC-Plugin-Spotify, then you may have issues with XBMC and/or Spotify, and the XBMC-Plugin-Spotify fixes it.
