As I said earlier, it is a community journal, so I hope that there will be many countries submitting articles. I am confident that the journal will grow rapidly. This paper is about the interaction between DNA and lead. This interaction may be different ages and people have different levels of lead exposure. So this interaction may change with age and lead exposure. This may indicate that some people will be more prone to DNA damage than others. People who are exposed to more lead may be more likely to experience DNA damage and this may therefore be an effect which will be more common in younger people, because they have not fully adjusted to their environment. A variety of user interface (UI) techniques have been used to enhance the ease of use and effectiveness of existing user interfaces. For example, user may need to use the first object in a set of objects on the screen before using the next object in the set of objects on the screen. For simplicity and/or clarity of illustration, the figures illustrate the general manner of construction known to those skilled in the art merely for purposes of description. As will be appreciated, the form and arrangement of particular elements or steps may be changed without breaking the scope of one or more of the claims. The benefits of being a U.S 79a2804d6b
