Q: Display multi values in mysql I have an issue that I don't know how to solve. I am trying to display field values in mysql, but it seems like it's not the right way to do it. This is my table: Table that I want to display In my select, I am trying to return:

"columnA | columnB | columnC" But when I try to do that, I got it like this: "columnA | columnC" and, "columnB | columnC" But

with the code above, I can't get the amount, description and barcode all together in the same array. Is there anyone who can help me?

A: If you need to merge this into one array: while (\$row = mysql_fetch_array(\$result)){ \$i++; \$amount = \$row['amount']; \$description = \$row['description']; \$barcode = \$row['barcode']; \$data['amount'][] = \$amount; \$data['description'][] = \$description; \$data['barcode'][] = \$barcode; }
